

Environmental Policy

Stewart Signs Ltd are a well-established Livery company.

We manufacture and install a wide variety of sign and self-adhesive products using advanced screen process, digital printing and cutting techniques.

We operate a programme of continual improvement in our environmental performance and pollution prevention, aiming to minimise the environmental impacts resulting from our activities.

We will ensure that the company complies with all relevant environmental legislation, regulations and any other requirements to which the company subscribes.

We reduce atmospheric emissions, the consumption of energy and minimise waste, reusing and recycling where practical.

Improvements in our environmental performance will be achieved by maintaining an environmental management system that complies with BS EN ISO 14001, enabling improvement objectives and targets to be established and implemented which concentrate on: -

Transition to the 2015 ISO Standard, minimising waste, reduction of non-renewable energy use and improving the environmental performance of our subcontractors.

Sourcing raw materials where practical that meet our customer's environmental requirements regarding performance, lifespan and recyclability.

This policy has been communicated to all employees and contractors; it is also available to all interested parties on request from the company office at Chandler's Ford Industrial Estate, Eastleigh.

Signed

(QHSE Director)
